

# HOMEWORK #4 @ 15 points

- Write in a neat and organized fashion; use a pencil.
- Label each section and exercise; do the exercises in the order assigned.
- All exercises must be clearly separated from each other.
- Use a one-column format (no more than one exercise per row/line).
- Draw the coordinate system using a straightedge and clearly label the axes and all the points used.
- In word problems, define all variables and use appropriate units.
- For an exercise to be complete there needs to be a detailed solution. Do not just write down an answer. No proof, no credit given!
- No sloppy homework will be graded!
